

Tomas Kovarnik M.D. received his cardiology training at Charles University in Prague, Czech Republic in 1998. He is currently Assistant Professor of Cardiology at the IInd Dept. of Internal Medicine at Charles University College of Medicine, Prague, Czech Republic. In addition to his busy interventional cardiology clinical practice, he is working towards a Ph.D. degree exploring the possibilities of intravascular ultrasound in cardiology. He is a principal investigator of the HEAVEN study (Virtual Histology Evaluation of Atherosclerosis Regression During Atorvastatin and Ezetimibe Administration) and a Director of NIH subcontract at Charles University – 3D & 4D Analysis of Coronary Hemodynamics. He is member of the Czech Society of Cardiology and the European Society of Cardiology.
